Illustrated in Heimbüchler I, page 291. A rare and appealing piece for the specialist. Signed E. Diena, R. F. Engel. Certificate Heimbüchler (Scott 1, Gi. 1, Mi = € 10'000).

To have a better chance of being successful as a postal bidder we recommend setting a limit for the total amount of your purchases (excl. 19% buyers premium): for example, bidding on a range of lots with a total amount of 10'000 sFr and setting a limit of 7'500 sFr for your purchases means that the total for lots knocked down to you will not exceed the limit you have set. We know from experience that postal bidders are rarely successful on all lots. On the other hand, you might have been interested in other lots as well, but not knowing which lots would be knocked down to you and being worried to spend more than a certain amount, you did not bid on them. Giving a total purchase limit (see also the Bid Form in this catalogue) enables you to have a better chance of being a more successful postal bidder!

To have a better chance of being successful as a postal bidder we recommend setting a limit for the total amount of your purchases (excl. 19% buyers premium): for example, bidding on a range of lots with a total amount of 10'000 sFr and setting a limit of 7'500 sFr for your purchases means that the total for lots knocked down to you will not exceed the limit you have set. We know from experience that postal bidders are rarely successful on all lots. On the other hand, you might have been interested in other lots as well, but not knowing which lots would be knocked down to you and being worried to spend more than a certain amount, you did not bid on them. Giving a total purchase limit (see also the Bid Form in this catalogue) enables you to have a better chance of being a more successful postal bidder!
